

Name _____

GitHub Workshop Lab Guide - Windows

Your Tasks (Mark these off as you go)

- ☐ Define key vocabulary
- ☐ Create a GitHub account
- ☐ Install Git on your computer
- ☐ Configure your username and email
- ☐ Install Visual studio code
- ☐ Clone a repository
- ☐ Complete your assignment with Visual Studio Code
- ☐ Push changes to a repository
- ☐ Receive credit for this lab guide

☐ Define key vocabulary

- Open up your browser and search for definitions to the following terms as they relate to “Git”. For example you could type “Git vocabulary”.
- Work with your partner to write definitions for the following terms.

Git

Click <i>Create Account</i> when done	
Check your email and Enter code.	
Select <i>Just me</i> and <i>Student</i>	
Scroll to the bottom and click <i>Skip personalization</i>	

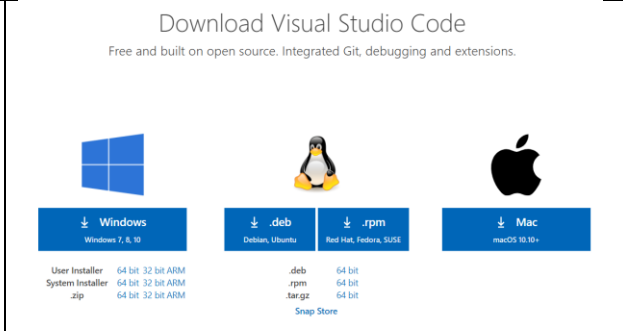

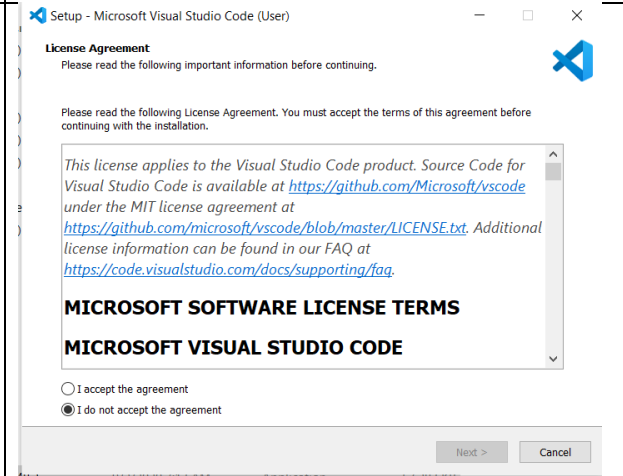

❑ Install Git on your computer

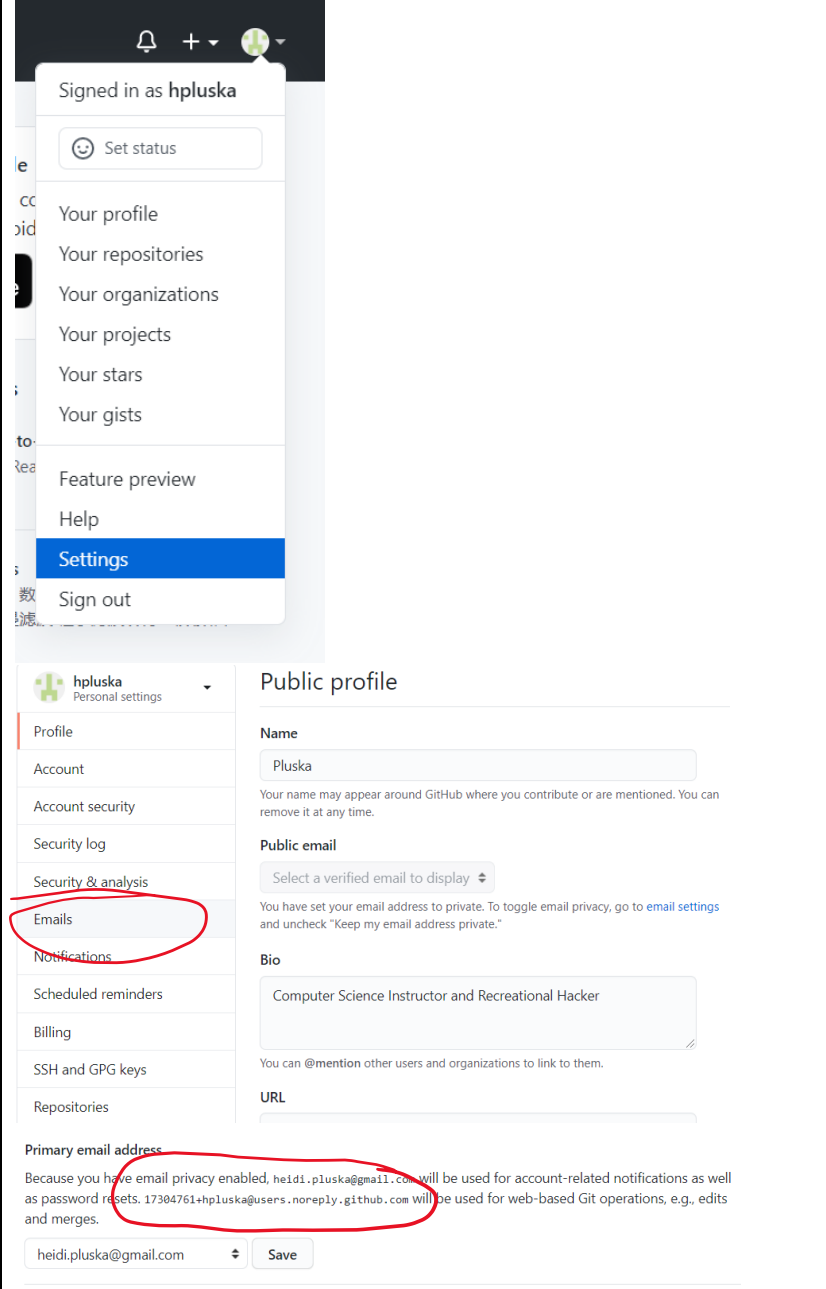

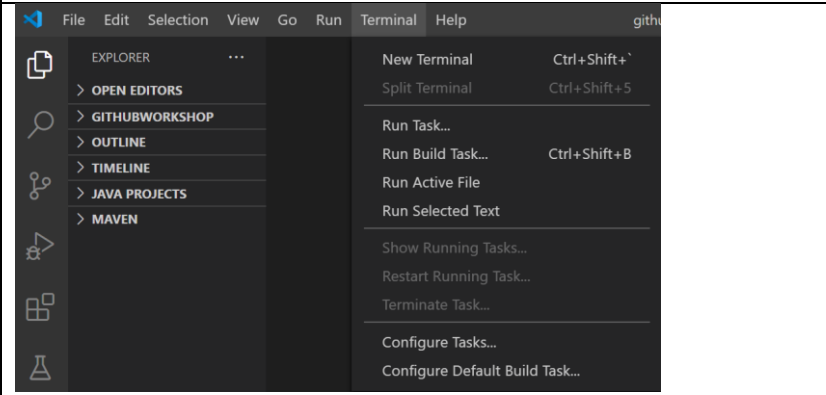

If you are using a Pluska issued computer with a Linux OS, you may skip this section	
Navigate to https://git-scm.com/downloads and download Git	

<p>Locate the file and install per your operation system</p>	
--	---

❑ Install Visual Studio Code

<p>If you are using a Pluska issued computer with a Linux OS, you may skip this section</p>	
<p>Navigate to https://code.visualstudio.com/download and download Visual Studio Code</p>	
<p>Locate the file and install per your operation system</p>	

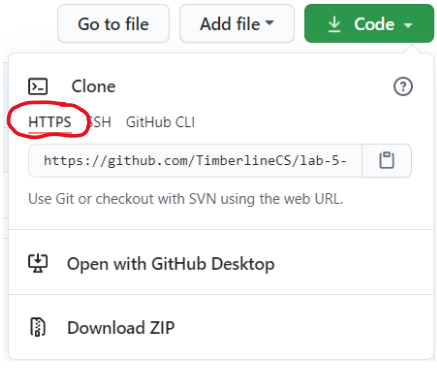

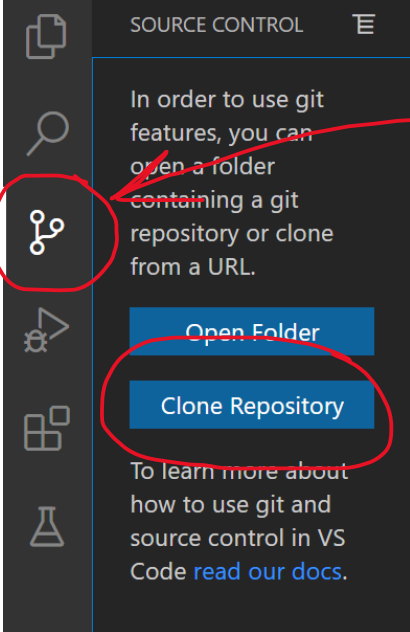

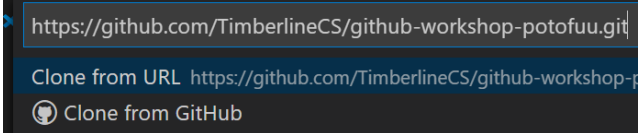

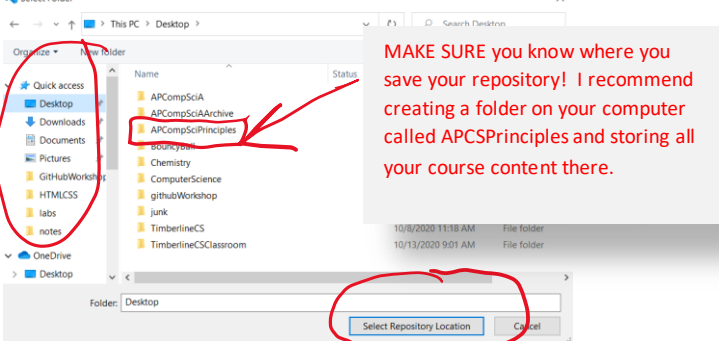

❑ Configure your username and email

<p>Log in to GitHub and locate your no-reply email</p> <ul style="list-style-type: none">- Click on <i>Settings</i> from your start menu- In the left menu, click on <i>Emails</i>- In the Primary Email Address section copy the no-reply email provided in the text	
<p>Open a Terminal</p> <ul style="list-style-type: none">- Open Visual Studio Code- From the menu at the top, select <i>Terminal, New Terminal</i>	
<p>Set the Git commit username and email on your local computer to the ones you used on your GitHub account.</p>	

<ul style="list-style-type: none"> - Locate the terminal window at the bottom of the screen. - At the terminal prompt, type the following command, paste the email you just copied in between the quotes, then hit <i>Enter</i>. <pre>git config --global user.email "paste the email you just copied here"</pre> <ul style="list-style-type: none"> - To set your username, copy the following command, type your GitHub username in the quotes, then hit <i>Enter</i>. <pre>git config --global user.name "paste your username here"</pre>	<div> <div>PROBLEMS</div> <div>OUTPUT</div> <div>DEBUG CONSOLE</div> <div>TERMINAL</div> </div> <div> <div>Windows PowerShell</div> <div>Copyright (C) Microsoft Corporation. All rights reserved.</div> <div>Try the new cross-platform PowerShell https://aka.ms/pscore6</div> <div>PS C:\Users\heidi> </div> </div>
---	--

□ Clone a repository

<p>Navigate to Google Classroom and locate the <i>Code Challenges</i></p> <p>This is listed after <i>Complete the Code Challenges</i> under the current lab</p>	<div> <div> <div>📁</div> <div>Lab 1: GitHub Workshop</div> </div> <div> <div>Posted Aug 16 (Edited Oct 2)</div> <div> <ul style="list-style-type: none"> - Complete the Lab Guide - Complete the Code Challenges - https://classroom.github.com/a/cfjeJxe- </div> </div> <div> <div>  <div> <div>GitHubWorkshop.pdf</div> <div>PDF</div> </div> </div> </div> </div>
<p>Locate your name to join the classroom</p>	<p>Join the classroom:</p> <p>AP CSA P2 2324</p> <p>To join the GitHub Classroom for this course, please select yourself from the list below to associate your GitHub account with your school's identifier (i.e., your name, ID, or email).</p>
<p>Click the green button to accept the assignment</p>	<p>Accept the assignment —</p> <p>GitHub Workshop</p> <p>Once you accept this assignment, you will be granted access to the <code>github-workshop-hpluska</code> repository in the <code>TimberlineCS</code> organization on GitHub.</p> <div>Accept this assignment</div>
<p>Refresh this page to see the link to the assignment.</p>	<p>You accepted the assignment, GitHub Workshop . We're configuring your repository now. This may take a few minutes to complete. Refresh this page to see updates.</p>

<p>Click on the blue link to go to the assignment repository.</p>	<p>You're ready to go!</p> <p>You accepted the assignment, GitHub Workshop.</p> <p>Your assignment repository has been created:</p> <p>https://github.com/TimberlineCS/github-workshop-hpluska-4</p> <p>We've configured the repository associated with this assignment (update).</p>
<p>In the GitHub assignment repository you just accepted, locate the Code button and copy the https link. Make sure HTTPS is selected.</p>	
<p>Return to Visual Studio Code</p> <ul style="list-style-type: none"> - Click on the <i>Control Source</i> icon in the left menu - Click on the <i>Clone Repository</i> button 	 <p>control Source</p>
<p>Locate the text box at the top of the window and paste the URL to the repository you just copied, then click <i>Enter</i></p>	
<p>Navigate to where you would like to store the repository.</p> <p>The click <i>Select Repository Location</i></p>	 <p>MAKE SURE you know where you save your repository! I recommend creating a folder on your computer called APCSPinciples and storing all your course content there.</p>

In the bottom right corner of the screen locate the *Would you like to open the cloned repository?* Window. Click the *Open* button

□ Complete your assignment with Visual Studio Code

- Locate the *README.md* file in the left menu and click on it.

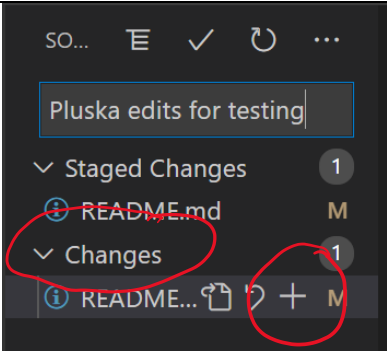

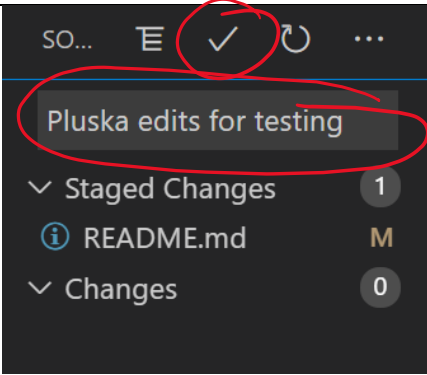

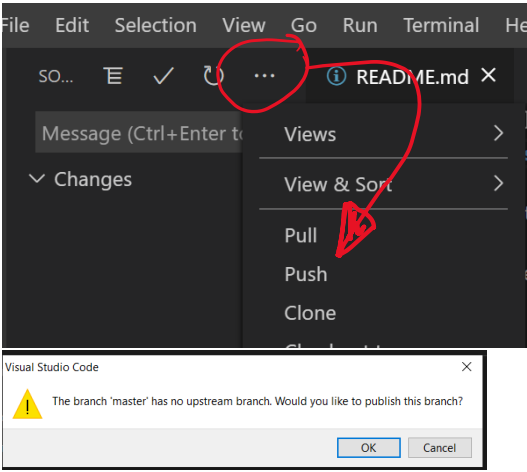

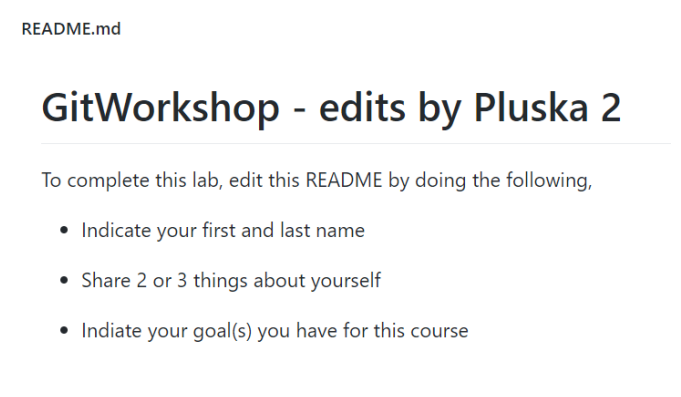

The file you clicked on is now open in the editor window. Answer the prompts. When you are done, type *ctrl-s* to save your file. You can also save your file by selecting *Save* from the *File* menu.

```
1 # GitWorkshop
2
3 To complete this lab, edit this README by doing the following,
4 |
5 - Indicate your first and last name
6
7 - Share 2 or 3 things about yourself
8
9 - Indiate your goal(s) you have for this course
10
```

□ Push changes to a repository

After you save the file you have changed, a blue circle with a number will appear on the Source Control icon. This means you have 1 pending change to push to GitHub. Click on the source control icon to open the Git menu.

<p>Pushing your work back to GitHub is a three part process – Stage, Commit, Push.</p> <p>You will notice Visual Studio Code tracks the changes you have made to files. Locate the file you just changed under the <i>Changes</i> tab. Then click the plus sign next to it to stage your changes.</p>	
<p>To commit your changes you must first type a message in the dialogue box. This message should be descriptive and brief. Click the check mark when done.</p>	
<p>To push your changes back to GitHub, select Push from the Source Control menu. Access this by clicking on the 3 dots.</p> <p>If you see the warning message, just click <i>OK</i>. You should only see this the first time you push.</p>	
<p>Now return to your GitHub assignment repository and refresh the page. Check out your edited file!</p> <p>BAM!</p>	

❑ **Receive Credit for this lab guide**

Submit this portion of the lab to Pluska to receive credit for the lab guide. Once received, your completed README will also be graded and will count towards your final lab grade.
