Set 6: Lossless Data compression

Name	Period			
Skill 6.02 Exercise 1				
Navigate to https://studio.code.org/s/csp1-2021/lessons/9/levels/1				
Watch the video on how to use the compression widget, https://youtu.be/LCGkcn1f-ms				
Select the text shown.				
Choose text: So wake me up when it's all over Whel				
Copy and paste the original text below				
Take 10 minutes and see how much you can compress the text. Copy and paste your compressed text below.				
Original text				
Compressed text				
T				
Skill 6.02 Exercise 2				
The alphabet is an example of text that cannot be compressed, can you think of others?				
Refer to the text in the previous example, which words could not be used to compress the file				
Skill 6.03 Exercise 1				
Refer to a portion of the heart image shown below.				
There is a portion of the heart image shown below.				
How should the 2 nd row be encoded in RLE				
How should the third row be encoded in RLE				

Set 6: Lossless Data compression

Name Period

Skill 6.03 Exercise 2

The following is a compression of a 6x6 black and white icon, using RLE. What mathematical symbol does that icon resemble?

2,2,2

2,2,2

0,6

0,6

2,2,2

2,2,2

Skill 6.03 Exercise 3

Which icon below would be most compressed using RLE compression? Explain?

Skill 6.04 Exercise 1

The characters in a sequence were optimized using the Huffman algorithm. Use the optimized binary to decode the sequence below.

111001

character	binary code
а	010
С	00
g	011

Make sure you start at the first bit on the left, and match up the codes from left to right. What DNA string do you come up with?

The same characters were optimized using the Huffman algorithm, resulting in a different set of codes. Use the optimized binary code to decode the sequence below,

001000011

characte	Binary
r	code
а	001
С	01
g	999
t	1
